

Back Ditching Schedule and Objectives

Key initiatives for the Stormwater Division's back ditching crew:

- Continue promoting safety as a standard, maintaining a policy of providing excellent service for our customers
- Respond promptly to tickets from the 311 call center
- Generate a production schedule that will specify the dates a particular area will be maintained (cut & clean ditches)
- Utilize our bush hog more effectively; the bush hog is used to cut grass on flat surfaces, which will help employees in the back ditch to continue productivity.

One last way our division will continue to meet and satisfy our initiatives is to maintain operational equipment and conduct an inventory of all equipment. This will ensure the equipment is in good working condition before we enter the most demanding time of the year. Once inventory has been taken, we have to make sure all equipment can withstand the rigors of use. This will help us maintain our standards for productivity.

THE SLOPE MOWER

APRIL SCHEDULE
